

Crosses across all State Federations to work for increased appropriations for State and city Boards of Health, and to seek to influence state universities to undertake extension work for the education of the public in disease prevention, as is already being done in Missouri, Wisconsin and Nebraska.

The General Federation has requested the Children's Bureau to issue a leaflet containing simplified information for the use of mothers in the instruction of children in sex hygiene.

The General Federation went, on record at Chicago, in June, in approving state and municipal legislation requiring the reporting of several diseases to Boards of Health, as in the case of other contagious and infectious diseases, and also approved the Abatement and Infestation law which makes it possible, without complicated process to rid the city of houses of prostitution, as has been done in Iowa and ten other states.

Club women all over the country are increasingly interested in public health question, and they are in a position to do much to influence public opinion and the actions of those in authority along this line. They agree with Dr. Devine, in his masterly address at the Chicago Biennial, that health is economic, because sound men cannot be exploited; that it is moral, because sound men will eliminate poverty, and substitute educational reformatories and custodial hospitals for jails. Sound men and women will also solve completely the age-long sex problem, because they will know that "friendship, comradeship, companionship are incompatible with lust."

Dear Friends of the Federation:

Under the stress and strain now existing, caused by the great conflict now waging in Europe, and while the very foundation of the human order seems to be breaking up, it is the hour for women to take stock and look to the ways of their households and see that they are not to be imposed upon by unusual conditions, time for mortal bullets to be shot. Foodstuffs are the essentials of life. You may suspect clothes, but clothes are negligible. You can find a clique where clothes are an extravagance, or a mere concession to social custom, but the need for food is primal and has to do with every phase of life. The home is the heart of the universe, and no State or Nation is greater or better than its homes. Let us keep this fact in mind, and let us as women rejoice that this wonderful task has been placed in our hands. We are not only the home-makers and the home-makers, but we represent the purchasing agents for the family, the pennies and dollars are passed from the purse of our husbands through our fingers into the coffers of the butcher, the baker, the candlestick maker. For us the factories turn out their finest fabrics, their furnitures and fittings, and since women are the gravest and pleasure-seekers, we are built the luxurious trains, the splendid ocean steamers, and in modern transportation, woman is largely considered. As woman speaks, so speaks the world. Let her speak now regarding the high cost of living, for it is her problem. As Emerson says "Creative economy is the essence of significance." Now that we have this high cost of living to contend with, this is the time to act and learn to reach the greatest efficiency in the home to meet the need expense, and at the same time maintain a high standard of living. The cost of living can be diminished to a certain extent, should the women do away with the habit of calling for unnecessary delivery of small articles such as they might easily carry to their homes without any inconvenience. These deliveries necessitate a heavy daily expenditure on the part of the merchant. Short waists, short measures, adulteration and fraud are all the results of careless buying, and all can be done away with and can be easily remedied if the women refuse to tolerate it. Judicial living doesn't mean that one shall deny oneself. It means cutting out the needless and senseless expenditures that there may be more money for the things that are sensible and useful, on

Fiery Blood Disorders Checked

The Sources of Disease are Cleaned and Blood Purified

Those who have used S. S. S. marvel at the way it checks blood diseases. See a man today with his skin all broken out; see him again in a week or two after using S. S. S. and he is a wonder to behold, all cleared up, skin healthy, eyes bright, a big smile replaces the droop. What is S. S. S. that can accomplish such wonderful results? First of all it is a natural medicine. Like milk, eggs and other foods that can not be patented. S. S. S. owes it to Nature. Its power to overcome disease just as food prevents starvation. S. S. S. is not a combination of prescription drugs. It is a preparation direct from medicinal plants that retains all the virile properties of what we need, what we must have in the blood to counteract these destructive tendencies that assail us throughout life. If it were not for our natural secretions to sustain us, aided by such known help as S. S. S. there would be small chance of any of us surviving childhood.

Get a bottle of S. S. S. today from any druggist but be careful to avoid the substitutes palmed off on the unwary. S. S. S. is prepared only by The Swift Specific Co., 52 Swift Bldg., Atlanta, Ga., and for private medical advice write briefly your symptoms to their medical department they will take excellent care of you.

the state, city, village, community and individual rests this responsibility. There is in Chicago a society called "The Ways of Thrift, how men and women have made the best of things." Its purpose is to show each individual how to make the best of their opportunities and help the neighbor to make the best of their opportunities, without waiting to persuade the world to some great change in conditions. How opportune such an association at this crisis in affairs, when the map of the world is changing and when our great America must feel the results. So closely interwoven is the fabric of Nations, that one great disaster can not fail in a measure to affect all. If the European war forces the necessity for economy on the American people, let the women of Texas be the first to realize the situation, and set a standard for economy and judicious buying.

"God give us women a time like this demands, with great hearts, strong minds, true faith, and willing minds with convictions and a will, ready to dare and do."

Yours truly,
MRS. HENRY B. FALL,
President, Texas Federation of Women's Clubs.

Dewar Punch — for receptions

JAPAN NOW AN IMPORTANT CONSUMER OF COTTON CROP

JAPANESE COMPETITION HAS SERIOUSLY CURTAILED AMERICAN SALES.

WASHINGTON, Sept. 5.—With the exception of India, China is the greatest importer of cotton goods in the world and Manchuria has long been one of the best markets for American cotton goods. In recent years, however, Chinese competition has reduced certain American sales in that field. The chief factor in the development of the cotton industry in Japan and that country's success in the Chinese market is that their cotton mills are smaller and the labor is very inexpensive. Japanese cotton mills and cotton goods to many countries, but for some time past manchuria, where there is little cotton production, has been one of the best markets for American cotton goods. The Japanese cotton industry is growing rapidly and the manufacture here is aimed at meeting requirements that would otherwise be met with import.

The mills here are greatly increased by lack of money and experience, as well as by the lack of skilled operatives and the difficulty under their system of training unskilled operatives, of creating and maintaining a trained force. The cost of the mill is so great that with high interest charges and high taxes which have been greatly increased since the Russo-Japanese war, the manufacturers here are making all attempts to the minimum to cover requirements that would otherwise be met with import.

able in countries making the higher classes of goods that require a single grade of cotton.

Most of the yarns and cloths produced by Japanese mills are made from a mixture of Indian, American, and Chinese cotton, and the low cost of raw material thus obtained permits them to sell their cheaper cotton textiles in the West. The labor is very inexpensive. Japanese cotton mills and cotton goods to many countries, but for some time past manchuria, where there is little cotton production, has been one of the best markets for American cotton goods. The Japanese cotton industry is growing rapidly and the manufacture here is aimed at meeting requirements that would otherwise be met with import.

With double-decked railroads using quick schedules between Fort Worth and Denver, including express dining car service, advertising all meals at moderate prices and under conditions that insure the best economy, and carrying passenger and freight rates lower than New York Central and Pennsylvania, the Texas & Pacific, also standard sleepers from Dallas, Houston, Galveston, and San Antonio, Austin and Waco in connection with the Santa Fe, and the Denver & Rio Grande, leaves nothing to desire in the way of transportation service to and from the delightful territory referred to—and is there in a class to itself.

Ticket Agents of either of the several lines herein mentioned, or

Mr. A. Glasson, G. P. A., Fort Worth, Texas, will gladly supply beautifully illustrated resort booklet maps, schedules and information as to how round-trip fares, and all rates and correspondence.

for the people of Texas, Louisiana, Oklahoma and adjoining territory, Colorado, Denver and Boulder, Colo., are three of the most attractive, easily reached and comparatively inexpensive vacation places in the West; that they are excellently reinforced by numerous others near by, and that, with their cool climates, pure and mineralized waters, delightful atmospheres, pure and rugged picturesqueness, no equally inspiring or healthful situations can be found in any direction.
